

Mississippi Steel Processing, LLC

A Leading Flat Rolled Toll Processor Located at the SDI Columbus Mill

Mississippi Steel Processing LLC is committed to service excellence in toll processing, storage and delivery of flat rolled steel products. Our strategic location next to Steel Dynamics' mill makes us the processor of choice for both distributors and mill-direct OEM customers throughout the South.

Our state-of-the-art facility brings in coils of up to 90,000 lbs. of 0.017" to 0.625" material from the mill, eliminating inbound freight charges. We produce sheets up to 84" wide by 70' long and slit coils of up to 0.625", all packaged to your specs and delivered by truck, rail or barge by our on-site logistics team.

MSP customers enjoy 24/7 online access to their job status, inventory, QC records and shipping information through our secure metals management web portal.

Our partnership with Steel Dynamics, Inc. allows us to process hot rolled, HRPO, CR, Galvanized, and Prepaint from the most advanced technology electric arc furnace facility in the USA on some of the highest capability processing lines in the industry:

Process Line	Thickness	Width	Max. Coil	Notes
Red Bud Stretcher	0.056" - 0.625"	36" - 84"	80,000 lb./88" OD	Lengths 24" to 660"
Slitting 1	0.112" - 0.625"	36" - 76"	90,000 lb./84" OD	Processes Hot Roll (HR), HRPO
Slitting 2	0.017" - 0.125"	20" - 72"	60,000 lb./82" OD	Processes HRPO, CR, Galv.,PrePaint

- 265,000 ft² Building
 - 114,000 ft² of enclosed master coil storage
 - 151,000 ft² of processed materials storage
 - 13 bridge cranes from 15 to 50 tons
- Metals Processing Management
 - Extensive EDI capability
 - 24/7 secure online customer access to inventory, order status, QC records

 - Staging area for 120 truck/trailers
 - Indoor loading of up to 5 rail cars
 - Access to all major rail lines
 - 7 miles to Tombigbee River barge terminal
 - Full service, on-site logistics company

Slitting • Cut-to-Length • Storage • Logistics

MSP provides complete flat-rolled toll processing and materials management services, including master coil storage, processed material storage and in-house logistics services. Our capability to handle extra long sheets - up to 70 feet long - is unique in the region.

We serve both OEM-direct and service center customers of SDI and strive to be as responsive as possible. Our goal is to complete processing orders of material on hand within 2 to 5 days.

Our storage charges are very competitive. We can accommodate scheduled release and JIT programs utilizing an on-site logistics firm, Modular Transportation, or your carrier. We even offer a 'Drop & Pick' service where we load your trailers so they are ready for your tractor pickup. And our rail spur connects to all major rail lines serving the USA, Mexico and Canada
